The screenshot shows the Visual Studio Code interface. On the left, the Explorer pane displays a file tree for a project named 'PORTFOLIO-BUILDING'. The tree includes folders 'activity1', 'activity2', 'activity3', and 'activity4'. Inside 'activity3', there are files '1.c', 'hello.c', 'hello.exe', 'readme.md', 'try.md', and 'activity4'. The main editor area shows a terminal window with the following output:

```
PS C:\Users\RASHMITA\OneDrive\Desktop\PORTFOLIO-BUILDING> git add .
PS C:\Users\RASHMITA\OneDrive\Desktop\PORTFOLIO-BUILDING> git commit -m "Added greet function with Prajwal using Live Share"

The bottom status bar shows the current branch as 'main' and the Live Share status.

6.readMe Collaboration Log

The screenshot shows the Visual Studio Code interface. The Explorer pane on the left shows the same file tree as in the previous screenshot. The main editor area shows the 'readme.md' file with the following content:

```
1 ## COLLABORATION LOG
2 PRAJWAL monkeydraco
3 the greet()function
4
5 # GitLens
6 GitLens teaches us that looking at code history should be easy and
7 instant. You do not need to open a separate terminal or website to see who
8 wrote a line.
9
10 # LiveShare
11 Live Share teaches us that coding is a social activity. You can invite
12 team members straight into your workspace. You do not need to push code or
13 share files manually just to fix a bug together.
```

On the right, a 'Preview readme.md' window shows the rendered version of the README file. It features a 'COLLABORATION LOG' section with the names 'PRAJWAL monkeydraco' and 'the greet()function'. Below this, there are sections for 'GitLens' and 'LiveShare', each with a brief description of their functionality.
